

Issuing Refund

This guide provides a straightforward process for issuing refunds, ensuring that users can efficiently handle transactions while maintaining customer satisfaction. By following these steps, users can minimize errors and streamline their refund procedures, making it easier to manage customer returns. It's an essential resource for anyone looking to enhance their point-of-sale operations and improve overall service quality.

A mobile payment interface with a light gray background. In the center, there is a numeric keypad with three rows of three buttons each. The first row contains the numbers 4, 5, and 6. The second row contains the numbers 7, 8, and 9. The third row contains the letter 'C', the number 0, and a button with a black 'X' icon. Below the keypad, there are two buttons: a white 'CANCEL' button on the left and a dark gray 'DONE' button on the right. The 'DONE' button is highlighted with a green circle. On the right side of the screen, there is a vertical gray bar with a rounded top, which appears to be a card reader or a physical button. At the bottom of the screen, there is a dark gray horizontal bar.
