

Remove PIN Access, Card Only (DMs Only)

This guide provides a straightforward process for removing PIN access and enabling card-only login for staff in a restaurant management system. By following these steps, managers can enhance security and streamline employee access, ensuring that only authorized personnel can log in. It's an essential resource for restaurant managers looking to optimize their operational protocols.

Search for restaurant.

The screenshot shows the BAR POS interface. On the left is a sidebar with navigation links: Home, Staff, Employees (highlighted), Reports, Configuration, Orders, and Help. The main content area is titled 'Employees' and includes a 'Share Status' button and a '+ New Employee' button. A notification banner at the top states: 'A change that impacts a clocked-in employee will take effect after End-of-Day'. Below this is a 'Filters' section with a 'Location' dropdown menu (circled in green) currently set to 'BK-09785-KY-Mount Sterling-Amples' and a checked checkbox for 'Include Terminated Employees'. A search bar (outlined in red) is located below the filters. The employee list table has columns for NAME, PIN, CARD, FINGER, TERMINATED, and JOB (SECURITY LEVEL). The table is updated as of 2/3/2026 11:17:17 AM. The first employee listed is Adam Myers, a Team Member (Cashier). Other employees listed include Aleshia Hunter, Alexander Biller, and another Alexander Biller, all with green checkmarks in the TERMINATED column.
